- **Fits In or On Most Vehicles** | Cars, Vans, SUV's
- **Limited Lifetime Warranty** | Guarantees customer satisfaction
- **Possible Reimbursement** | Many car companies reimburse all or part of the cost with the purchase of a new vehicle.
- **Optional Rechargeable Mobile Power Pack**

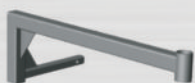

Liberator Installation

All three Liberator models, the Fold-Able, Stow-Able and Liberator Plus, are easily installed. The Fold-Able Lift provides a simple hinge design to store the lift inside the trunk. The Stow-Able Lift easily disassembles into separate components that can be stored individually. The deck and receiver base options of the Stow-Able Lift gives your customers the choice of permanent mounting within the vehicle or as an extension of a Class II or Class III external hitch receiver. The Liberator-Plus Lift is a reinforced heavy duty lift with a 400 lb. lifting capacity and easily disassembles into separate components that can be stored individually.

Vehicle Specifications

The Liberator Trunk Lifts will fit most vehicles. The Deck Base should be mounted by a qualified installer to avoid damage to the vehicle's components located underneath the mounting surface. When using the Receiver Base, combined scooter and lift weights must not exceed the tongue weight limits of your hitch or vehicle. Check with your vehicle manufacturer for hitch tongue weight limits.
